

MOHIT KUMAR SAHU

📍 Bhopal, Madhya Pradesh, India ✉️ mohit26lnct@gmail.com 🌐 in/mohitkumar1221

SUMMARY

Final-year B.Tech student specializing in CSE with AIML, skilled in Python, Django, and database management. Developed a role-based grievance management system featuring automated workflows, real-time tracking, and RESTful API integration, enhancing operational efficiency. Experienced in data science projects involving customer segmentation using K-Means clustering and visualization tools such as Seaborn and Plotly. Eager to apply analytical and development skills in a junior data engineering and data science role.

EXPERIENCE

Django Developer Intern

Infosys Springboard

February 2025 - April 2025, Remote

- Built a role-based Grievance Handling System using Django, SQLite, and Bootstrap, supporting admin, employee, and customer workflows.
- Set up an automatic escalation mechanism using Python threading to address unresolved grievances after two days.
- Applied access control measures to enhance system security.
- Engineered robust data modeling structures with Django ORM, optimizing database performance for over 2,000 grievance records and ensuring data integrity using SQLite schema migrations and ER diagram tools.

PROJECT

E-commerce Customer Segmentation using RFM & K-Means

- Segmented over 5,000 e-commerce customers using RFM analysis and K-Means clustering, identifying high-value and at-risk groups to inform data-driven marketing strategies.
- Engineered RFM features and applied the Elbow Method to determine optimal cluster numbers, validating results through statistical analysis.
- Visualized segments with Seaborn and Plotly to extract actionable insights for boosting customer retention and marketing effectiveness.

Movie Recommender

- Designed a movie recommendation system using content-based filtering approaches.
- Used Python libraries including Pandas for data manipulation, NumPy for computations, and Streamlit for the web app interface.
- Enhanced recommendation accuracy by incorporating user rating patterns and movie metadata features such as genre and cast.

Grievance Handling System

- Built a role-based grievance management platform using Django, SQLite, and MySQL.
- Integrated dynamic data filtering and automated report generation to streamline grievance tracking.
- Implemented an automatic escalation mechanism using Python threading to address unresolved grievances after two days.

EDUCATION

Bachelor of Technology in Computer Science and Engineering (Specialization: AIML)

Lakshmi Narain College of Technology • Bhopal, India • November 2022 - Present

Senior Secondary Education

St. Aloysius Senior Secondary School • Jabalpur, India • 2022

Secondary Education

St. Aloysius Senior Secondary School • Jabalpur, India • 2020

SKILLS

Skills 1: Python, Django, MySQL, DBMS, Machine Learning, Git, C++, Data Structures and Algorithms

Libraries: K-Means, Seaborn, Plotly, Pandas, Numpy, Scikit-Learn
